

COVID-19 UPDATE:

Due to the risk of exposure to COVID-19 (Coronavirus) in the healthcare setting, we are evaluating how to best meet the medical needs of our patients.

Procedures

In agreement with the CDC, the recent mandate from our Governor, and the national gastrointestinal societies, we are carefully reviewing all procedures and postponing any non-urgent and/or elective procedures in order to reduce your risk of possible exposure in the health care setting. We appreciate your patience as this situation unfolds. If you have any questions or concerns about an upcoming procedure, please do not hesitate to call our office.

Office Visits

We are currently reviewing our ability to provide ongoing care for office patients via telehealth. We will provide an update as soon as we know more. Please call with any questions or concerns about an upcoming appointment.

Infusions

We will continue all biologic IV infusions through our Infusion Center to ensure the ongoing health of our inflammatory bowel disease patients. National expert opinion is that continuing chronic maintenance immune suppression is a lower risk than a flare of your disease at this time. Please review the following links and call with any questions or concerns.
